DETAILED ACTION

Election/Restrictions

1. Applicant's election of Species VIII (Fig.10) in the reply filed on 8/5/2005 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Nishiyama et al. (JP 2001330280).

Nishiyama et al. disclose a thermal storage device. Referring to Figs.4 and 10, the device comprises air-to-liquid heat exchanger 6, an eutectic thermal battery 9, first coolant loop 11, first pump 10, second coolant loop 8,22, liquid-to-direct heat exchanger 5, cold heat sink 2 and second pump 1.

4. Claims 16-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Fischer et al. (U.S. Patent Number 5,513,500).

Fischer et al. disclose a cooling system. Referring to Fig.2, the system comprises an air-to-liquid heat exchanger 9A, a liquid-to-direct heat exchanger 41, cold sink 16 and pump 7 in a closed loop.

5. Claim 37 is rejected under 35 U.S.C. 102(b) as being anticipated by Fischer et al. (U.S. Patent Number 5,513,500).

Fischer et al. disclose a cooling system. Referring to Fig.2, the system comprises an air-to-liquid heat pump 9A, a liquid-to-direct heat exchanger 41, cold sink 16 and pump 7 in a closed loop. The heat pump 9A rejects heat from interior to the coolant in the loop 5,6.

Double Patenting

6. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

7. Claims 38-40 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1,2,3,4 and 5 of copending Application No. 10/641,415. Although the conflicting claims are not identical, they are not patentably distinct from each other because a heat sink, a first coolant heat sink with a first coolant loop, a second coolant heat sink with a second coolant loop, heat pump and cooling device are claimed in both applications.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

8. Claims 32-36 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 38-40 of copending Application No. 10/369,441. Although the conflicting claims are not identical, they are not patentably distinct from each other because both set of the claims contain the same limitations such as air-to-liquid heat exchanger, eutectic thermal battery, liquid-to-liquid heat exchanger, liquid-to-direct heat pump, heat sink and related control modes.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Allowable Subject Matter

9. Claims 7 and 8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Chen-Wen Jiang whose telephone number is (571) 272-4809. The examiner can normally be reached on Monday-Thursday from 8:00 to 6:30.
